

LoadSpring's Application Management Solutions

Our Application Management Solutions

LoadSpring Solutions provides intelligent Application Management Solutions to your organization through our proprietary Collaborative Application Management (CAM) Console. With LoadSpring, entire project teams can standardize on Primavera software, eliminating double entry, while increasing your security posture.

Benefits of Hosting Primavera Software with LoadSpring CAM Console:

- **Extend Access** - Launch Primavera applications through a web browser from anywhere
- **Reduce Risks** - Service Level Agreement (SLA) guarantees your uptime or pays you back
- **Reduce Travel Time & Cost** - 'Single-click' real time collaboration to support and train users and hold online meetings
- **Rapid Deployment** - Intelligent client detection allows for auto download and installation of a 'light weight', configure-free client to reduce roll out from months to days
- **Increase Security** - Advanced user management and control functions allow simple administration
- **Reduce IT Burden** - Off load cost and technology issues that impede project performance
- **Reduce Capital Investment** - Convert your assets (servers, etc.) into monthly expenses
- **Reduce Double Entry** - Everyone enters information in one central location
- **Enhance User Experience** - Custom utilities such as Inbox notification
- **System Level Application Support** - LoadSpring is responsible for issues such as access, file storage and printing

Our Application Management Solutions enables you to deploy your solution quickly and affordably, without procuring and managing your own applications, servers, and networks. You can go live in as little as 3 days instead of nine to twelve months. Your organization can save up to 30% over other internal solutions, and you pay on a convenient monthly basis.
